| Вох | No. I  | Nucleotide and/or amino acid sequence(s) (Continuation of item 1.b of the first sheet)  |
|-----|--------|---|
| 1.  | With   | regard to any nucleotide and/or amino acid sequence disclosed in the International application and necessary to the claimed nation, the international search was carried out on the basis of:   |
|     | a.     | type of material  X a sequence listing  table(s) related to the sequence listing  |
|     | b.     | format of material  X in written format  X In computer readable form  |
|     | c.     | contained in the international application as filed filed together with the international application in computer readable form  furnished subsequently to this Authority for the purpose of search   |
| 2.  | X      | In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. |

nternational application No. PCT/GB2004/000101

| Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)   |
|--|
| This international Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:   |
| 1. X Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:   |
| Although claims 21 and 26-30 are directed to a diagnostic method practised on the human/animal body, and claims 36-39 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compounds.  2. X Claims Nos.: 15,17-19 |
| because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:  |
| see FURTHER INFORMATION sheet PCT/ISA/210  |
|  |
| 3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).  |
|  |
| Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)   |
| This International Searching Authority found multiple inventions in this international application, as follows:  |
|  |
|  |
|  |
| 1. As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims.  |
| 2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  |
|  |
| 3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:  |
|  |
|  |
| 4. No required additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  |
|  |
|  |
| Remark on Protest  |
| No protest accompanied the payment of additional search fees.  |

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 15,17-19

Present claims 15 and 17-19 relate to a compound defined by reference to a desirable characteristic or property, namely that it binds specifically to the defensin polypeptide according to any one of claims 1-8. The claims cover all compounds having this characteristic or property, whereas the application provides support within the meaning of Article 6 PCT and disclosure within the meaning of Article 5 PCT for no such compounds. In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the compound by reference to a result to be achieved. Again, this lack of clarity in the present case is such as to render a meaningful search over the whole of the claimed scope impossible. Consequently, no search has been carried out for those claims.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
